

290 TRIPLE LAYER ACOUSTIC & FIRE SPEAKER HOOD

“A NEW
STANDARD IN
ACOUSTIC
DAMPENING
AND FIRE
SAFETY.”

Description

Elevate your home's acoustic experience with the Lithe Audio Fire and Acoustic Speaker Hood, setting a new standard for in-ceiling speakers. Fully compliant with UK and EU building and IEE Regulations, this product ensures fire safety while enhancing sound quality. Crafted to preserve fire resistance for up to 90 minutes, it complies with Parts B, L, C, and E regulations, making it an essential addition to any in-ceiling speaker installation.

Experience a dramatic decrease in sound leakage with the Lithe Audio Fire and Acoustic Speaker Hood. Its cutting-edge design reduces noise transmission by up to -9dB across all sound ranges. The innovative triple-layer acoustic construction limits backward sound leakage, ideal for installations below sensitive areas like a child's bedroom. It's a game-changer for peaceful, uninterrupted living.

Features

- Fits 6.5" and 8" ceiling speakers
- Prevents fire spread through ceiling voids, maintaining the ceiling's fire protection integrity.
- Significantly reduces sound transmission to upper floors.
- Acoustically rated, meeting Document L of building regulations.
- Fully compliant to building regulations B, L, C and E.
- Lightweight, flexible design, easy to install from above or below the ceiling.
- Quick, maintenance-free installation, perfect for both new builds and retrofits.
- Compatible with suspended or plasterboard ceilings.
